

ProfitStars Introduces Mobile Website Platform

- Mobile banking websites help financial institutions increase visibility and relevance in an expanding mobile market -

MONETT, Mo., Dec. 20, 2011 /PRNewswire/ -- Jack Henry & Associates, Inc. (NASDAQ:JKHY) is a leading provider of technology solutions and payment processing services primarily for the financial services industry. Its ProfitStars® division announced today the availability of the Mobile Website™ platform, which enables financial institutions to complement existing online and mobile banking solutions with websites designed distinctively for the mobile channel.

Mobile Website supports a rapidly expanding banking channel with websites developed specifically for smaller screens and on-the-go functionality while also maintaining the consistent look and ease of navigation that customers demand. It can improve customer service and increase revenue with mobile sites that are compatible with all traditional website designs and Internet banking providers. Each site is fully customizable, can be live in weeks, and is securely hosted by ProfitStars. Financial institutions can make ongoing updates easily using the platform's dynamic Content Management System (CMS).

Approximately 30 million Americans, or one out of every 10, accessed financial information via a mobile device in the fourth quarter of 2010, which represents an increase of more than 50 percent over the same quarter of 2009. As mobile adoption and demand continue to increase exponentially, financial institutions without a mobile presence are limiting their customer reach.

David Foss, president of ProfitStars, said, "Mobile has evolved to be an integral banking channel that more and more consumers expect their financial institutions to provide. Mobile Website is designed to help banks and credit unions of all sizes expand the conveniences of online banking into the mobile market in a way that is affordable and user-friendly. We believe that every financial institution needs a comprehensive mobile strategy to serve existing convenience-driven customers, to attract new ones, and to effectively compete."

ProfitStars has designed and currently manages and hosts more than 1,000 financial institution websites. It also offers optional comprehensive website reviews to help financial institutions prepare for FFIEC examinations. ProfitStars' website design, hosting, and security solutions are also preferred services of The Independent Community Bankers of America (ICBA). Additional information and sample mobile website pages are available at <http://discover.profitstars.com/mobilewebsite>.
