Monett, MO, February 7, 2023 - Jack Henry & Associates, Inc. (Nasdaq: JKHY), a leading financial technology provider, today announced results for the fiscal second quarter ended December 31, 2022.

According to **David Foss, Board Chair and CEO**, "We are very pleased to report an overall strong performance for the second quarter of our fiscal year. The sales organization continues to work a robust pipeline of financial institutions interested in our many best-of-breed capabilities and solutions. Much of that interest is being fueled by our outstanding digital banking offerings and the growing understanding of our differentiated technology modernization strategy. We are proud to be a well-rounded financial technology company that is committed to serving the needs of community and regional financial institutions in the United States and establishing a cloud-native ecosystem which, when applied to our digital, payments, lending, risk, and core platforms, helps our clients innovate faster, differentiate strategically, and compete successfully while serving the evolving needs of their accountholders."

¹ See tables below reconciling non-GAAP financial measures to GAAP.

² The guidance assumes no additional acquisitions are made during the year.

³ See tables below reconciling fiscal year 2023 GAAP to non-GAAP guidance.

⁴ See tables below on page 12 reconciling Net Income to non-GAAP EBITDA.

Operating Results

Revenue, operating expenses, operating income, and net income for the three and six months ended December 31, 2022, compared to the three and six months ended December 31, 2021, were as follows (all dollar amounts in this section are in thousands, except for per share amounts):

Revenue (Unaudited)

⁵ Operating margin is calculated by dividing operating income by revenue. Operating margin plus operating expense components as a percentage of total revenue may not equal 100% due to rounding.

According to **Mimi Carsley, CFO and Treasurer**, "For the second quarter of the fiscal year, private and public cloud, card processing, transaction and digital and remittance all contributed to revenue growth. As expected, based on the lack of consolidation among financial institutions, deconversion revenues were down considerably in the second fiscal quarter and are expected to be minimal the remainder of the fiscal year. As a result, our GAAP revenue increased 2%, but was up solidly 6% for the quarter on a non-GAAP basis. The decrease in deconversion revenues put downward pressure on GAAP operating income, which decreased 15%; however, non-GAAP operating income increased 4% thanks to the entire Jack Henry team's disciplined focus on cost management."

Impact of Non-GAAP Adjustments

The table below shows our revenue and operating income (in thousands) for the three and six months ended December 31, 2022, compared to the three and six months ended December 31, 2021, excluding the impacts of deconversion fees, acquisitions, and gain/loss.

Use of Non-GAAP Financial Information

Generally Accepted Accounting Principles (GAAP) is the term used to refer to the standard framework of guidelines for financial accounting in the United States. GAAP include the standards, conventions, and rules accountants follow in recording and summarizing transactions in the preparation of financial statements. In addition to reporting financial results in accordance with GAAP, we have provided certain non-GAAP financial measures, including adjusted revenue, adjusted operating income, adjusted segment income, adjusted cost of revenue, adjusted operating expenses, non-GAAP earnings before interest, taxes, depreciation, and amortization (non-GAAP EBITDA), free cash flow, and return on invested capital (ROIC).

We believe non-GAAP financial measures help investors better understand the underlying fundamentals and true operations of our business. Adjusted revenue, adjusted operating income, adjusted operating income margin, adjusted segment income, adjusted cost of revenue, and adjusted operating expenses, eliminate one-time deconversion fees and associated costs, the effects of acquisitions and divestitures, and gain/loss on the disposal of assets, all of which management believes are not indicative of the Company's operating performance. Such adjustments give investors further insight into our performance. Non-GAAP EBITDA is defined as net income attributable to the Company before the effect of interest expense, taxes, depreciation, and amortization, adjusted for net income before the effect of interest expense, taxes, depreciation, and amortization attributable to eliminated one-time deconversion fees, acquisitions and divestitures, and gain/loss on the disposal of assets. Free cash flow is defined as net cash from operating activities, less capitalized expenditures, internal use software, and capitalized software, plus proceeds from the sale of assets. ROIC is defined as net income divided by average invested capital, which is the average of beginning and ending long-term debt and stockholders' equity for a given period. Management believes that non-GAAP EBITDA is an important measure of the Company's overall operating performance and excludes certain costs and other transactions that management deems one time or non-operational in nature; free cash flow is useful to measure the funds generated in a given period that are available for

debt service requirements and strategic capital decisions; and ROIC is a measure of the Company's allocation efficiency and effectiveness of its invested capital. For these reasons, management also uses these non-GAAP financial measures in its assessment and management of the Company's performance.

Non-GAAP financial measures used by the Company may not be comparable to similarly titled non-GAAP measures used by other companies. Non-GAAP financial measures have no standardized meaning prescribed by GAAP and therefore, are unlikely to be comparable with calculations of similar measures for other companies.

Any non-GAAP financial measures should be considered in context with the GAAP financial presentation and should not be considered in isolation or as a substitute for GAAP measures. Reconciliations of the non-GAAP financial measures to related GAAP measures are included.
